

Surgical Center Service Solutions

Our single source solution provides you with comprehensive services needed to sustain your biomedical equipment and support your mission, people and processes. This provides you a competitive advantage throughout the lifecycle of your facility, from asset acquisition to disposition.

Modern Medical's team of experts will collaborate with you to design the clinical engineering program which delivers patient safety, equipment uptime and regulatory compliance. Delivering a full suite of customizable services, we implement and establish a medical equipment management program that helps maximize your facility's clinical performance and therefore financial returns.

Benefits of Modern's Single Source Solution

- One point of contact for ALL your equipment service requirements.
- Existing infrastructure to sustain your needs
- Application of expert knowledge, industry experience and breadth of technical skills to support your facilities, clinicians and patients.
- Consultative approach which allows us to build solutions that address each of your facilities specific challenges.
- Proven risk management and regulatory support guarantees compliance.
